

Learning Enhancement

***' Every child deserves an education'.
Marie Madeleine d' Houet***

Learning Enhancement at Genazzano FCJ College supports student learning so that all students have access to opportunities to help them enjoy a positive, enriching learning environment. The Learning Enhancement Team ensures that students have access to the rich learning environment within the classroom with their peers and the opportunity to access internal and external programs that support a love of learning.

Gifted and talented students are often creative thinkers who may require a different approach to learning:

- at a faster pace
- independent, self-paced study
- complex, challenging and open-ended tasks that use higher ordered thinking and problem solving skills
- meaningful tasks with practical application
- depth of content

We work as team with:

- Parents/Guardians
- Teachers
- Team Leaders
- Performance Psychology Department
- Career Adviser
- College Nurse
- Community support agencies

Learning Enhancement supports:

- An individual's potential
- Pathways for future learning
- Inclusivity
- Differentiation
- A positive approach to learning
- An opportunity for all student's to be critical learners and thinkers

We support the students:

- through their research and inquiry learning process
- by ensuring that students experience a love of learning in the classroom setting
- ensuring that each student's learning potential is recognised and supported in all areas of the curriculum
- delivering programs and opportunities for students that will extend and enrich their love of learning
- ensuring that we focus on students' strengths and build their overall capacity and confidence to learn

We support the family:

- by organising and leading Program Support Group (PSG) Meetings
- setting specific goals for student learning
- listening to and working with families to support their child's learning
- by offering opportunities that will enrich their child's learning
- by giving families a voice in their child's learning journey

We support the Classroom Teacher by:

- identifying students' learning goals
- offering in-classroom support with the students
- working with the teacher to adjust or differentiate the curriculum
- suggesting strategies to support student learning
- maintaining ongoing records of student learning

Support is also offered through:

- Homework Club held on Tuesday afternoons from 3.30pm - 5.00pm
- Access to Library Services and Research from Monday – Thursday from 3.30pm - 7.30pm
- Maths Assist for years 7 -12 students every lunchtime in W239
- Maths Assist for Years 7 and 8 every Wednesday morning in W239 from 7.15am – 8.15am.
- Support from LE Teachers before or after school as arranged
- Alumnae Maths Tutoring for students in Years 5 – 12 from 3.45pm – 4.45pm in the d'Houet Library on Tuesdays, Wednesdays and Thursdays.
